

# Newport Beach Center for Plastic Surgery

Nirav Savalia, MD

**D**r. Nirav Savalia is a Board Certified Aesthetic & Reconstructive Plastic Surgeon who has built his world class Newport Beach practice with a philosophy and reputation of emphasizing a “naturally beautiful” appearance.

At the Newport Beach Center for Plastic Surgery, located in Fashion Island, Dr. Savalia and his highly experienced team perform a full spectrum of cosmetic enhancements, including aesthetic surgery of the breast, body and face, as well as leading edge non-surgical procedures for facial and skin rejuvenation.

Dr. Savalia is a nationally recognized leader in both Aesthetic & Reconstructive Breast Surgery, and holds the distinctive appointment as Director of Oncoplastic & Aesthetic Breast Surgery at Hoag Hospital, here in Orange County—as well as Clinical Assistant Professor appointments at both USC, Keck School of Medicine and UC-Irvine. His extensive training and experience in complex breast surgery has made him a highly sought-after breast revision surgeon

by women who are unhappy with prior breast implant surgery. In addition, he has developed a unique and highly successful technique in oncoplastic breast reconstruction surgery - a form of immediate reconstruction that is designed to conserve as much breast tissue as possible while also aggressively removing all the cancerous tissue, allowing women to be spared unnecessary mastectomies as a result.

Dr. Savalia's creative approach to plastic surgery blends aesthetics, art and technology to achieve the very best results for patients. His patient centered approach to the practice of medicine focuses on honing a keen sensitivity and awareness to individual patient needs. Undoubtedly, it is the uncompromising commitment to these two cornerstones—surgical excellence and first-class care—that have earned Dr. Savalia his 5.0 star rating on RealSelf, his Orange Coast Surgeon of Excellence standing, and his reputation of innovation, attentiveness, warmth and compassion in serving aesthetic and reconstructive patients in Newport Beach.
